HW#2

To class Tree (on Blackboard), add the following methods :

1- int: noOfNodesInLevel(int x): returns number of nodes in level x (root at level 0).

2- boolean isFull( ): returns true if the tree is full, false otherwise. Full tree is the tree that all its nodes (except the leaves) have two children.

Due date : Sunday 13/12/2015 (Mid night).
